Summary

Trilingual Computer Science student building backend engineering depth through hands-on API development with Python, Django REST Framework, and SQL. Comfortable working across the stack — from clean C++ systems design to production-style REST APIs — with a growing focus on backend architecture and security. Seeking an internship where I can contribute real engineering work while continuing to build toward distributed systems and backend specialization.

Education

Cairo University

Oct 2024 – Aug 2028 (expected)

B.S. in *Computer Science*

GPA: 3.26

Relevant Coursework: Structural Programming, Object Oriented Programming (OOP), Discrete Math, Mathematics, Data Structures, Database, Network

Projects

Sports League Manager API (*In Progress*)

- Designing and building a RESTful backend using Django REST Framework, applying ViewSets and custom `@action` routes alongside standalone APIViews to model real-world league operations (teams, standings, matches).
- Implemented custom exception handling, structured logging, and serializer-level control (extra_kwarg, source) to keep the API layer clean, predictable, and production-oriented.
- Practicing advanced querying with SQL and Django ORM (annotate() vs. aggregate()) to support reporting-style endpoints like standings and statistics.
- Managing the codebase with Git/GitHub using Conventional Commits.
- [View on GitHub](#)

Bank System with ATM Service

- Built a banking management system with ATM functionality using C++.
- Simulated core banking features: *user access control*, *account records*, and *ATM module*.
- Emphasized **functional programming** and clean **C++ code**.
- [View on GitHub](#)

Joie Arts - GUI Filter Application

- A modern C++ / Qt-based Image Team-oriented Filter Application that provides an interactive, slider-driven interface for image editing, transformations, and artistic effects with **+25 filters**.
- My role was to build the C++ architectural design of the project; I maintain the structure so that my teammates could integrate the other parts of the project — the filters & the GUI.

Experience & Extracurricular Activities

Game Development Community, Cairo University

Oct 2024 – Present

Non-Technical Lead

- My journey starts as a Digital Marketing member to DM Head leading to Non-Technical Lead.
- Led digital marketing strategies to promote game development activities on campus.
- Managed social channels, visual identity, and branding efforts.
- Increased engagement and streamlined member communications which led to grew Facebook Followers *by more than 30% at my first year.*

Certifications & Courses

- Mastering Critical Skills in Data Structures using C++, Udemy (Dr. Mostafa Saad) — Sep–Dec 2025
- Mastering Critical Skills in Algorithms using C++: Part 1, Udemy (Dr. Mostafa Saad) — Feb–May 2026
- Git & GitHub, Data Science 365 — Nov 2024
- Python Programmer Bootcamp, Data Science 365 — Nov 2024
- HubSpot Marketing Course, HubSpot Academy — July 2025

Skills

- Programming Languages: Python, C++, Java
- Frameworks: Django
- Tools: Git, GitHub, VS Code, MS SQL Server, Antigravity, Wireshark
- Soft Skills: Marketing, Communication, Storytelling, Content Writing

Languages

- Arabic: Native
- English: Fluent
- French: Advanced
